

BERLIN SCIENCE WEEK DARE TO KNOW

SCIENCE FESTIVAL & NETWORKING PLATFORM

1-10 NOVEMBER IN BERLIN AND ONLINE

EACH YEAR IN NOVEMBER, MORE THAN 20,000 PEOPLE FROM THE WORLDS OF SCIENCE, BUSINESS, POLITICS, ART, AND SOCIETY AT LARGE COME TOGETHER IN BERLIN FOR THE BERLIN SCIENCE WEEK.

Guided by the motto 'Dare to Know', we partner with organisations from around the world to showcase scientific excellence, promote debates on the world's major challenges, and find interactive and creative ways to make science, research and innovation engaging.

Our focus is on exchange and reflection: the programme is based on interactive and often interdisciplinary formats ranging from panel discussions, workshops, exhibitions, to VR-experiences, film screenings, music installations and much more.

AN INSPIRING FESTIVAL FOR SCIENCE AND SOCIETY

Berlin Science Week connects over 600 contributors and more than 20,000 participants in over 200 events.

Our audiences come from a multitude of social, economic, and national backgrounds. We reach scientists, researchers, academic institutions, NGOs, businesses, the press, and politicians, as well as the interested general public. The relevance of our programme is evidenced by the steady growth of our social media following (>25,000 subscribers), and by more than 250 articles in national and international press. During the Berlin Science Week, an average of 22,000 people from all over the world visit our website.

HOW TO GET INVOLVED

Join our mission and get involved if you are a national or international university, a research institution, a science-based start-up, an innovative business, a science engagement or science policy initiative, or an interdisciplinary science project in arts and culture.

We offer several options for getting involved: you create a digital or hybrid event, you opt for an in-person event at any location of your choice in Berlin, you become part of our CAMPUS at the Museum für Naturkunde in Berlin, or you join our ART&SCIENCE FORUM at Holzmarkt.

Participation in the festival is free of charge, the implementation and financing of the events lies in your hands. We coordinate, curate, and communicate the programme to the media and the public, creating awareness and visibility. We facilitate networking opportunities, synergies and connections, and offer our expertise on science communication and event management.

Our registration period ends on 31 July 2023. Get in touch and let's discuss your ideas!

WHAT OUR PARTNERS SAY

Berlin Science Week is science communication at its best.

- Thomas Susanka, Science Notes Magazine / University of Tübingen.

The Berlin Science Week provides a very valuable opportunity to reach out beyond the scientific community, and to foster the dialogue with stakeholders and the general public.

- Matthias Tang, Head of Press and Communication of the Research Institute for Sustainability / Helmholtz Centre Potsdam (formerly IASS)
